

## **FUND OBJECTIVE**

The main objective of the Fund is to achieve consistent income streams through investment in select portfolio of securities and investments specified in the Trust Deed. The Fund's assets are invested in Federal Government bonds, Sub-national bonds, corporate bonds and high-quality money market securities. The Fund is not affected by the fluctuations in the equity markets. However, opportunities for capital appreciation are dependent on changes in interest rate.

## MARKET REVIEW, OUTLOOK AND STRATEGY

The Debt Management Office (DMO) conducted its May-2024 bond auction, with a total offer size of N450.0bn across the 5-YR "APR 2029" (reopened), 7-YR "FEB 2031" (reopened) and 9-YR "MAY 2033" (newly opened) bond papers. At the auction, investors' demand was strong, as total subscription printed at N551.3bn. Notably, the DMO undersold the auction by 0.8x, allocating a total of N380.8bn worth of bond papers. Consequently, the marginal rate on the 2029 and 2031 papers fell marginally by 1bp and 1bp, to settle at 19.29% and 19.74%, respectively. Meanwhile, the marginal rate on the newly opened 2033 paper printed at 19.89%.

In the secondary market, we observed buy pressures dominate the market as investors' sentiments were mainly bullish. Thus, average yields on sovereign bonds closed lower to print at 18.7% in May-2024, a 25bps m/m decline from the 18.9% print in Apr-2024. In tandem, we observed buy interests in corporate bonds, as average yields at the end of May-2024 fell by 11bps m/m to close at 20.8% (previously 20.9%).

Looking ahead into June-2024, we expect mixed sentiments in the secondary bonds market. On one hand, we expect mild bullish sentiments to persist given that market participants believe that rates in the market may have peaked. On the other hand, we believe bond yields will trend northwards as bearish investors' sentiments dominate the market. This is underpinned by concerns about the nation's fiscal health and the efficacy of its monetary policy. Also, the hawkish stance of the MPC will keep rates elevated in the fixed-income market. In the primary market, we foresee healthy participation in the FGN Bond auction.

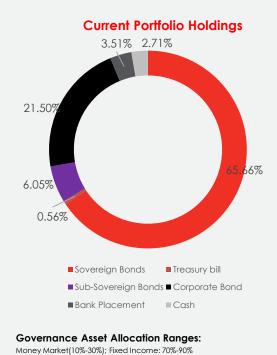

## **FUND FEATURES**

Fund Manager	United Capital Asset Management Ltd				
Base Currency/Start Year	Naira/2006

# Fixed Income Fund Return Vs Benchmark (Annualized)

#### **RETURN HISTORY**

	2020	2021	2022	2023	2024 YTD
United Capital Fixed	9.35%	6.40%	6.33%	6.88%	5.42%
Benchmark	3.54%	9.45%	12.83%	13.30%	18.48%

<sup>\*</sup>Represents the Fund's Annualized Return vs the Benchmark's Annualized Return

## **PERFORMANCE REVIEW**

The United Capital Fixed Income Fund annualized return for the month of May 2024 is 3.44% while the annualized YTD return is 5.42% relative to a 18.48% posted by the benchmark for the same period.

The return can be attributed mainly to accrued coupons on bond holdings as well as accrued interest on money market instruments held in the fund during the period.

In May, the improved system liquidity in the financial system compared to the previous month led to a decline in yields in the secondary market month on month.

For the remainder of H1, we expect system liquidity to improve owing to coupon payments and maturing NTB. Also, expected rate hike by the monetary authority in July will further drive yields northwards.

The portfolio remains invested in FGN Bonds, money market instruments and sub-sovereign bonds with descent yields. We will maintain current allocation to enhance yield income for the Fund.

# WHY CHOOSE THE FUND?

- Not exposed to equities market volatility
- Seamless entry and exit
- Low entry threshold
- Professional management with robust risk framework
- Long term capital preservation and growth

## **INVESTMENT RISK**

- Market risk
- Macroeconomic instability
- Interest Rate Risk

#### **HOW TO PARTICIPATE**

- 1. Log in to our online platform www.investnow.ng
- 2. Click on Bond Fund
- 3. Click on "Open and account" and complete the online form
- 4. Fund your account online with a one-time payment or recurrent payments
