Governance Asset Allocation Ranges:

Non-Interest Bank Deposit (20%-40%); Sukuk Bond: (60%-80%)

FUND PERFORMANCE REVIEW

The United Capital Sukuk Fund annualized YTD return for the month of October 2026 is 10.78% relative to the return of 16.79% posted by the benchmark for the same period.
The return can be attributed mainly to rental income and profit on the fund's bond holdings as well as non-interest bank deposits held during the period. There were also several maturities which were reinvested at higher profit rates and helped shore up the return of the fund.

In November 2026, demand for FGN bonds is expected to remain strong. Institutional investors and reinvestment flows should provide support. Improvements in the macroeconomic environment, particularly declining inflation rate, stable exchange rate, improvement in the country's rating and tax advantage of the Bond should stimulate strong demand for FGN Bond. Consequently, the yields on the FGN Bond may drop marginally from the level attained in October 2026.

The Fund maintains sufficient exposure to Sukuk bonds, Non-Interest bank Deposits, Mudarabah, Murabaha and other Shariah-compliant contracts with significantly higher yields. We will maintain current allocation to enhance returns for the Fund.
