

# United Capital Wealth For Women Fund | Monthly Fact Sheet

January-23

## FUND OBJECTIVE

The objective of the United Capital Wealth for Women Fund is to promote the financial inclusion of the female gender by increasing their access to financial investment products and addressing the current imbalance of most investment products being skewed towards the male gender.

The Fund Manager seeks to maintain a balance between realized income and capital growth to ensure regular distribution payments and continuous appreciation in asset values while ensuring optimal safety of assets and adequate liquidity to meet the Fund's obligations as they fall due. The Fund invests in money markets and equities. The equity portfolio is tilted towards companies with significant female representation on their boards and management teams.

## MARKET REVIEW, OUTLOOK AND STRATEGY

The domestic equity market maintained its upward trend in January, notably propelled by the depressed yield environment and robust system liquidity. As a result, fund managers and investors kept switching assets to profit from lower stock prices and valuations. The decent earnings reports of corporates for FY-2022 also significantly improved investor confidence, which effectively led to increased bargain hunting across profitable stocks with strong fundamentals. Notably, price movements across large-cap stocks, MTNN (+4.7% m/m), BUAFODS (+14.6% m/m), GERGU (+29.9% m/m), DANGCEM (+2.3% m/m), AIRTELAFRI (+1.5% m/m), and BUACEMEN (+1.7% m/m), played a decisive role in the bourse's strong close in January. The benchmark NGX-All Share Index (NGX-ASI) climbed by 3.9% m/m to close at 53,238.7 points. Consequently, YTD return settled at 3.9%, with market capitalisation growing N1.1tn to settle at N29.0tn.

The CBN conducted two NT-bill auctions in the primary market during the month. The CBN offered a total of N56.9bn worth of maturing bills in the first. Investor's demand was strong owing to the buoyant liquidity in the system. Thus, the auction was oversubscribed by 6.8x with total subscription printing at N389.0bn. Notably, the CBN opted to sell just the amount on offer. Consequently, the stop rate across the 91-day, 182-day and 364-day bills declined by 75bps, 285bps and 119bps to settle at 2.0%, 4.3% and 7.3%, respectively. In the second auction, there was a total offer size of N220.5bn across the 91-day, 182-day, and 364-day papers. Investors' demand was overwhelmingly strong as total bids surpassed the total amount on offer, with a bid-to-cover ratio of 4.7x to print at N1.0tn. The strong interest was again a by-product of elevated system liquidity as banks sought to invest funds before the hammer of CBN's CRR debits. Overall, interest was skewed toward the longer end of the curve, with the bulk of total bids aimed at the 364-day bill, oversubscribed at a 4.0x bid-cover ratio. The CBN opted to sell exactly what was on offer. Stop rates across all the bills plunged 17 bps, 253bps, and 252bps to print at 0.29%, 1.80%, and 4.78%.

Last month, the Debt Management Office (DMO) conducted its first FGN bond Auction for 2023, with N360.0bn worth of papers on offer across the following tenors: FEB 2028, APR 2032, APR 2037, and APR 2049. At the auction, investors' demand was strong, supported by the buoyant liquidity in the system, with appetite skewed towards the longer-tenured instruments. Thus, the auction was oversubscribed, with total subscription printing at N805.2bn and a bid-to-cover ratio of 2.2x. The 2028s, 2037s, and 2049s were oversubscribed with bid-to-cover ratios of 2.1x, 2.9x, and 2.9x, while the 2032 paper recorded a bid-to-cover ratio of 1.0x. Surprisingly, the DMO oversold the auction, allotting a total of N662.6bn vs N360.0bn on offer signalling the government's strong reliance on the domestic debt market. Also, we perceive an attempt by the government to frontload 2023 borrowings, with a focus on longer term debt. The marginal rate on the 2032s climbed by c.15bps to settle at 14.9%, while the 2037s remained unchanged at 15.8%. Lastly, marginal rates on the re-issued 2028 and 2049 papers printed at 14.0% and 15.9%, respectively.

**Looking ahead to the medium term, we retain our positive outlook for Nigerian equities, supported by depressed yields in the money market. We expect increased bargain hunting across fundamentally sound stocks with decent FY-2022 earnings performance. However, we see room for pockets of bearish sentiments from investors owing to profit-taking activities. We recommend fund managers cherry-pick stocks with low prices, solid valuations, and dividend performance in a bid to take advantage of extension of the current bullish run. Looking ahead, we expect that the downward pressures on rates in the money market will persist in Feb-2023, hinged on the expectations of buoyant system liquidity and net inflows in the quarter. Thus, we expect sustained downward pressure on funding rates and stop rates across auctions.**

3. Click on "Open and account" and complete the online form
4. Fund your account online with a one-time payment or recurrent payments.

## PERFORMANCE REVIEW

The United Capital Wealth For Women Fund returned 2.66% on a year to date (YTD) basis as at the end of January, compared to the composite benchmark (91-day T-bills and the ASI) return of 2.02% for the same period.

The domestic equity market maintained its upward trend in January, notably propelled by the depressed yield environment and robust system liquidity. The decent earnings reports of corporates for FY-2022 also significantly improved investor confidence, which effectively led to increased bargain hunting across profitable stocks with strong fundamentals. The benchmark NGX-All Share Index (NGX-ASI) climbed by 3.9% m/m to close at 53,238.7 points. Consequently, YTD return settled at 3.9%, with market capitalisation growing N1.1tn to settle at N29.0tn.

We remain conservative in line with the investment policy objectives, as our selection of fundamentally strong stocks and high yielding money market instruments should further enhance the returns of the Fund going
