FUND OBJECTIVE

The United Capital Nigerian Eurobond Fund is an openended mutual fund that is invested in Dollar denominated Eurobonds, floated by the Federal Government of Nigeria, as well as top-tier corporates. Subscribers can expect to receive competitive short to medium term capital appreciation on their USD holdings invested in the Fund better than they would receive on domiciliary deposits. The minimum investment is \$1,000 and multiples of \$500 thereafter.

MARKET REVIEW, OUTLOOK AND STRATEGY

In June, the Nigerian Eurobonds market closed on a bearish note as investors' bias against SSA Eurobonds trickled into the Nigerian Eurobonds market.

In July, the Nigerian Eurobonds market closed on a bullish note as investors sought to reinvest Eurobond principal and coupon payments totalling \$500.0mn and \$94.4mn, respectively that occurred during the month. Based on the foregoing, the average yield on Nigerian Eurobonds declined by 71bps m/m to print at 10.00%.

Looking ahead, we expect an upward movement in yields across the curve in August, as bearish sentiments return to the Nigerian Eurobonds market due to prevailing economic concerns. However, we would see buys at the end of the month as investors seek to reinvest \$151.81mn worth of coupon payments inflows.

PERFORMANCE REVIEW

The United Capital Nigerian Eurobond Fund returned 0.46% for the month of July. However, the year to date return of the fund is 5.77%, lower than the benchmark annualised return of 8.06% within the same period.

In July, the Nigerian Eurobonds market closed on a bullish note as investors sought to reinvest NGR 2023 maturity proceeds of \$500.0mn . This spurred buying interests and consequently resulted in a decline in average yield on Nigerian Eurobonds by 71bps m/m to print at 10.00%.

We will continue to mantain the required allocation ranges in line with the Trust Deed, and tactically pick higher yielding maturities in the sovereign bond space to enhance the performance of the fund.
