

# United Capital Wealth For Women Fund | Monthly Fact Sheet

July-23

## FUND OBJECTIVE

The objective of the United Capital Wealth for Women Fund is to promote the financial inclusion of the female gender by increasing their access to financial investment products and addressing the current imbalance of most investment products being skewed towards the male gender.

The Fund Manager seeks to maintain a balance between realized income and capital growth to ensure regular distribution payments and continuous appreciation in asset values while ensuring optimal safety of assets and adequate liquidity to meet the Fund's obligations as they fall due. The Fund invests in money markets and equities. The equity portfolio is tilted towards companies with significant female representation on their boards and management teams.

## MARKET REVIEW, OUTLOOK AND STRATEGY

In July, the bulls maintained their strong dominance in the Nigerian Exchange Limited (NGX) as investors' positive sentiments on fundamentally strong stocks persisted. In addition, the rally was spurred by the commencement of the Q2-2023 earnings season. Notably, buy-interests in large-cap stocks such as DANGCEM (+23.5% m/m) and BUACEM (+7.3% m/m), as well as banking stock, STANBIC (+28.7% m/m) drove the local bourse northwards. As a result, the benchmark NGX-All Share Index (NGX-ASI) climbed by 5.5% m/m to close at 64,337.5 points. Consequently, YTD return strengthened to 25.1%, from June's 19.5% print, with market capitalisation settling at N35.0tn.

The CBN conducted two (2) NT-bills primary market auctions in the month under review. At the 1<sup>st</sup> auction of the month, the CBN rolled over N141.8bn in maturing bills. The auction was oversubscribed by 4.9x, with total bids printing at N601.9bn. Stop rates across all the tenors tapered. Stop rates on the 91-day, 181-day, and 364-day bills slipped by 1bp, 87bps, and 29bps, to print at 2.86%, 3.50%, and 5.74%, respectively. At the 2<sup>nd</sup> auction of the month, the CBN rolled over maturing bills to the tune of N264.3bn. The auction was met with decent demand, up to N398.2bn, implying a bid-to-cover ratio of 1.5x. At the auction, the CBN allotted the exact amount on offer. That said, stop rates across all the tenors surged, climbing by 3.1ppts, 4.5ppts, and 6.2ppts, to print at 6.0%, 8.0%, and 12.2%, the 91-day, 182-day, and 364-day bills respectively.

In the primary market, the Debt Management Office (DMO) conducted the Jul-2023 FGN bond auction with a total offer size of N360.0bn across the 2029s, 2033s, 2038s and 2053s papers. At the auction, investors' demand came in strong, supported by the liquidity present in the financial system at the time of the auction. As a result, the total subscription printed at N945.1bn, implying a bid-to-cover ratio of 2.6x. Notably, the DMO oversold the auction, allotting a total of N656.7bn. Consequently, the marginal rates on the 2029s, 2033s, 2038s and 2053s papers declined by 140bps, 110bps, 135bps and 140bps to settle at 12.5%, 13.6%, 14.1% and 14.3% respectively.

In August, we expect liquidity to play a vital role in the direction of yields in the fixed-income market. The CBN's new disposition that mandates a strict 65.0% LDR compliance from the banks will pressure banks' demand for money as they struggle to meet the new directive. This will invariably weigh on the placement rates, keeping it suppressed around current levels (7.5% - 10.0%), with a higher likelihood of tapering by 100bps to 150bps, offered for their 65.0% LDR. On the liquidity drivers, we expect a total of c.66.8bn worth of coupon payments in August, 74.0% lower than c.257.46bn worth of coupon payments received in July. FAAC payments are expected to emerge as the critical liquidity driver in August. That said, we see pockets of bearish sentiments prevailing occasionally, particularly in the aftermath of August's bond auction. Overall, we expect mixed sentiments in the bonds market, with some investors favouring standoffish postures and liquidity driving the bullish sentiments. In addition, investors sentiments towards the Nigerian equities market would be mixed. Driving bearish sentiments would be the hike in benchmark interest rates and weak H1-2023 earnings (due to fx losses caused by the naira's devaluation). However, this would be oscillated by bulls chasing real returns in the high inflationary environment as the equities market will remain the most attractive market segment given the sustained depressed rates in the fixed income market.

2. Click on 'Wealth for Women Fund'
3. Click on 'Open and account' and complete the online form
4. Fund your account online with a one-time payment or recurrent payments.

## PERFORMANCE REVIEW

The United Capital Wealth For Women Fund returned 24.97% on a year to date (YTD) basis as at the end of July, compared to the composite benchmark (91-day T-bills and the ASI) return of 13.77% for the same period.

In July, the bulls maintained their strong dominance in the Nigerian Exchange Limited (NGX) as investors' positive sentiments on fundamentally strong stocks persisted. In addition, the rally was spurred by the commencement of the Q2-2023 earnings season. Consequently, YTD return strengthened to 25.1%, from June's 19.5% print, with market capitalisation settling at N35.0tn.

In the primary market, the Debt Management Office (DMO) conducted the Jul-2023 FGN bond auction with a total offer size of N360.0bn across the 2029s, 2033s, 2038s and 2053s papers. At the auction, investors' demand came in strong, supported by the liquidity present in the financial system at the time of the auction. As a result, the total subscription printed at N945.1bn, implying a bid-to-cover ratio of 2.6x. Notably, the DMO oversold the auction, allotting a total of N656.7bn. Consequently, the marginal rates on the 2029s, 2033s, 2038s and 2053s papers declined by 140bps, 110bps, 135bps and 140bps to settle at 12.5%, 13.6%, 14.1% and 14.3% respectively.

We remain conservative in line with the investment policy objectives, as our selection of fundamentally strong stocks and high yielding money market instruments should further enhance the returns of the Fund going forward.

## Investment Risks

- Market risk of equity exposure
- Macroeconomic instability
